

OMNi

Select Colors for your Message Lists

Personalize the colors per message category

Personalize your message lists with flexible color and layout options. Assign different colors to incoming, outgoing, sent-by-me, and document messages. You can also highlight failed messages with an alert color for quick visibility.

“Alternate Row Shading” greatly improves readability when working with long message lists.

Save your preferred color combinations as custom themes, or choose from pre-defined themes to get started quickly.

Omni allows a great deal of personalization, just to remind a few

- Arrange your message **list's** layout to suit your workflow (more [here](#))
 - **Horizontal**, ideal for users working with many columns
 - **Vertical**, focuses on message content and includes colored avatars
 - Vertical **Grid**, optimized for wide screens
- Personalize your Omni **Tags**, show/hide according to your needs (more [here](#))
- Show/Hide **columns** in your message list i.e. message Tags like Qwords, Vessel, Project are very popular among users. User column to easily mark messages “sent by me” is very useful in shared mailboxes. Arrange the width of every column.
- Saved **selections** are dynamic and automatically updated with new messages. These may also be added in the **Favorites**.

The **Tools Tab** gives you full control to tailor OMNi to your preferences.
