

## OMNi

### AI assistant setup for akereon AI Service

With Omni AI you are free to select from many LLM's (Large Language Models) including Openai Chat-GPT, Google Gemini, Meta Llama, gpt-oss, DeepSeek, Google Gemma, Mistral Nemo, MS Phi, Alibaba Qwen, Anthropic Claude et.al. and a variety of AI services.

akereon AI Service is dedicated to your own company, secure and not shared. The service may be customized with your company specific knowledge base embeddings.

This guide will help you to setup your company dedicated service as your provider. Select **Tools | AI Providers | Servers +Add**. You will need the following settings:

Server settings Advanced

Name \*

Driver \*

Server URL \*

Auth Token \*

Model

- **Driver:** OAPI Proxy
- **Server URL:** The same with your Omni server i.e. omni.company.gr
- **Auth Token:** <Your personal auth token>
- **Model:** gpt-oss-20b or the default for your AI service.

You may obtain <Your personal auth token> from your IT support or LgMAR's support.

akereon AI Service models are different in speed, reasoning/complexity and company knowledgebase. We suggest to consult with your AI provider on the best fit for your company. Below a brief description for models of this service:

- **LLaMA** Meta's latest collection of multimodal models
- **DeepSeek** Harmonizes high computational efficiency with superior reasoning.
- **gpt-oss** OpenAI's open-weight models designed for powerful reasoning
- **Mistral Nemo** Family of small and large models by Mistral AI SAS.
